PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable full-stack systems, performance-critical workflows, and developer-focused platforms. Proven track record of optimizing large-scale document generation systems, improving application performance by up to 86%, and delivering impactful user-facing solutions across enterprise products. Experienced in ReactJS, Python, System Design, and Workflow automation, with a strong focus on scalability, reliability, and clean engineering practices.

EXPERIENCE

Tekion April 2025 – Present
Software Engineer Bengaluru, Karnataka

- Architected a high-performance PDF generation system using Typst, reducing latency by 86% and supporting 1M+ monthly requests by replacing legacy infrastructures
- Engineered an AI-powered video generation pipeline using Veo 3, increasing recommendation conversion by 20% and streamlining technician onboarding via dealership opcode integration.

Tekion July 2023 – March 2025
Associate Software Engineer Bengaluru, Karnataka

- Developed a Page Break Algorithm to simulate real-world printing behavior, improving rendering consistency across A4, Letter, Legal, and custom document formats
- Built a consent management system for dealership customers, ensuring compliance with US and UK data privacy regulations for promotional communications
- Optimized technician wage calculation algorithms, increasing client profit margins by 15% and reducing payroll processing time by 20% for dealership workflows
- Integrated a scalable e-signature platform into the PDF generation pipeline, enabling seamless personalized document signing through customer portals

Tekion Jan 2023 – June 2023
Associate Software Engineer Intern Bengaluru, Karnataka

- Developed and integrated a keyboard shortcut widget across multiple internal products, streamlining complex workflows and improving user productivity
- Reduced customer form submission time by 30% by redesigning the data entry interface and optimizing state management in ReactJS.

Content Turbine June 2021 – August 2021
Full Stack Product Developer Intern Remote

- Built an interactive learning platform for software engineers using Flask, ReactJS, and Couchbase with hands-on sandbox-based training workflows
- Integrated web-based SSH terminal and Docker-based sandbox environments, allowing users to manage remote servers and experiment with preferred tech stacks directly within the platform

EDUCATION

Indian Institute of Information Technology, Guwahati 2019 – 2023
Bachelor of Technology in Computer Science Guwahati, Assam

PROJECTS

ALGOMINATION — GitHub

Django, HTML5/CSS3, JavaScript, anime.js

- Engineered an algorithm visualizer using Django and anime.js that renders real-time execution steps for 10+ data structures, utilized by 50+ students

Hostel Management System — GitHub

MERN (MongoDB, Express, React, NodeJS)

- Built a web-based solution for streamlining and digitizing day-to-day hostel activities, optimizing efficiency, and improving overall management
- Designed and seamlessly integrated a robust User Management System, incorporating secure authentication protocols and providing authorized access to confidential data

SKILLS

Languages: Python, JavaScript

Frameworks: ReactJS, Flask, Django

Databases: MySQL, Couchbase

Tools & Platforms: Docker, Chromium

Open Source Technologies: Typst, Veo 3, Ace Editor, Monaco Editor, webssh2
